PROFICIO®

SOLUTION BRIEF

Strengthen Your Cyber Resilience with ProSOC® MDR Enhancements

Proactive Protection Bundle

In today's digital landscape, cyber resilience has transitioned from being an optional consideration to an absolute necessity. With the proliferation of cyber threats, organizations are finding themselves increasingly vulnerable and in need of a proactive approach to fortify their defenses.

The key to bolstering cyber resilience lies in making oneself as expensive as possible to attack. By implementing both proactive measures to fortify defenses and responsive strategies to mitigate threats, attackers will have a hard time getting in.

This can be achieved through effective vulnerability management, promptly patching vulnerabilities, and maintaining visibility into confidential data exposure, compromised credentials, and illicit activities on the Dark Web.

Equally critical to cyber resilience is how quickly you can kick attackers out of your when they do get past your defenses. By automating threat responses, swiftly blocking attacks and containing compromises across networks, endpoints, identities, and cloud environments, you can mitigate threats before they wreak havoc.

By implementing these measures, organizations raise the cost and complexity for potential attackers, making infiltration considerably more challenging.

We understand the challenges organizations face in building cyber resilience. That's why we're excited to introduce our latest ProSOC MDR enhancement bundle designed to make your organization as resilient as possible against cyber threats.

Proactive Protection Bundle

What's Included

Risk-based Vulnerability Management (RBVM)

Implement proactive vulnerability management strategies to efficiently identify and patch vulnerabilities. This service utilizes cutting-edge vulnerability intelligence and prioritization techniques, coupled with asset discovery and Qualys-powered agent and network-based scanning. Enjoy the benefits of custom integrations and comprehensive monthly vulnerability reports, complemented by weekly remediation reviews including patching metrics and strategic planning.

Patch Management Service

Ensure your systems remain up-to-date and secure against known exploits, effectively reducing the attack surface. Our service offers endpoint agent-based patching, automating the patching processes to guarantee maximum protection for your endpoint devices.

Monthly Cyber Exposure Report

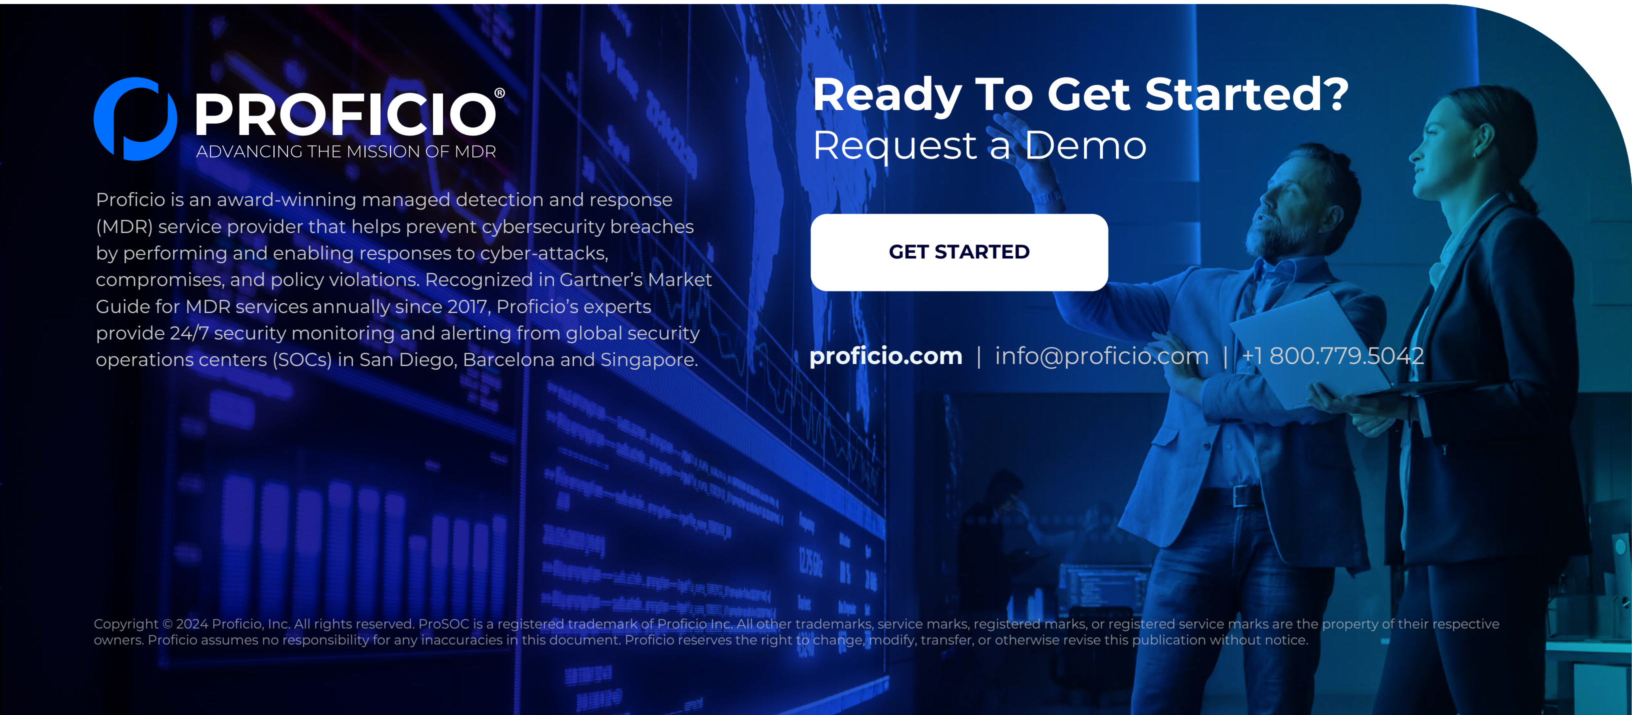
Gain invaluable insights into your digital risk landscape, empowering preemptive responses to emerging cyber threats. Uncover exposed assets such as sensitive information, compromised credentials, dark web activity, and financial data. Our asset management system provides detailed asset and exposure information including domains, URLs, and IPs, with monthly reports to keep you informed.

Active Defense Response-as-a-Service

Swiftly respond to cyber threats with our automated defense mechanisms, ensuring rapid response times of 2.33 minutes. Benefit from automated blocking of attacks and threat containment across networks, endpoints, identities, and cloud environments. Our service includes alert data enrichment with business context and response orchestration with integrations for ITSM, EDR, firewall, and Web Application Firewalls.

Risk-based Vulnerability Management(RBVM)	Patch Management Service	Cyber Exposure Monitoring	Active Defense Response-as-a-Service
● Monthly vulnerability reports ● Weekly remediation reviews ● Vulnerability intelligence and prioritization ● Asset discovery ● Qualys-powered scanning	● Endpoint agent-based patching for automated protection ● Real-time visibility into patch status and compliance ● Customizable patching schedules and policies	● Monthly cyber exposure assessments and reports **Assessments include:** ● Sensitive information ● Online discussion sites ● Dark web marketplace listings ● Exposed credentials ● And more	● 2.33 min response time ● Automated blocking of attacks across networks, endpoints, identities, and cloud ● Alert data enrichment with business context

Empower your business with our Proactive Protection Bundle designed to provide proactive protection against evolving cyber threats. Contact us today to learn more about how these enhancements to ProSOC MDR can benefit your organization.



PROFICIO®
ADVANCING THE MISSION OF MDR

Proficio is an award-winning managed detection and response (MDR) service provider that helps prevent cybersecurity breaches by performing and enabling responses to cyber-attacks, compromises, and policy violations. Recognized in Gartner's Market Guide for MDR services annually since 2017, Proficio's experts provide 24/7 security monitoring and alerting from global security operations centers (SOCs) in San Diego, Barcelona and Singapore.
